Breed Survey Report

Jabina Uanja

USA # A0001

Breed Survey Class Improvement

The owner of an animal selected in Breed Survey Class 2 may present the animal between the dates of January 1 and December 31 of the year of this Breed Survey for a Breed Survey Class Improvement. A Breed Survey class improvement, if granted, does not extend the time span of the original Breed Survey.

Breed Survey Extension for one year

Pregnant or lactating females can be reselected for one additional year during the year presentation for Reselection for life is necessary without having to appear at the survey. This applies only to females that are at least 42 days pregnant at the time of the Breed Survey or lactating females when the time between the date of whelping and the Breed Survey is less than 42 days. Contact the USA Office for the documentation required to be presented at the Breed Survey.

Reselection for life

Reselection for life is possible for the animal named herein, between the dates of January 1 and December 31 of the year following this breed survey, unless a Breed Survey Extension for one year has been granted. Failure to present the animal for Reselection within this time span will result in a lapse or termination of this Breed Survey.

Assessments on day of survey:

I. Evaluation of general condition, size, overall structure, firmness of ligaments, gait, instinctive behavior, self-confidence and ability to cope with stress:

Medium size, medium strength, somewhat stretched, flat withers, somewhat short croup, good angulations, pasterns should be straighter, elbows somewhat loose, good movement, however, not entirely tight back. ICS pronounced, does release.

II. Generalities:

a) Height at withers:	58	e) Pigment:	good
b) Chest depth:	25	f) Coat:	normal
c) Chest circumference:	48	g) Testicles:	
d) Weight:	28	h) Color/Markings:	

III. Temperament, nerves, gun sureness, instinctive behavior, self-confidence and ability to cope with stress:

a) Character/Temperament:	steady,natural
b) Alertness/Attentiveness:	present
c) Condition of nerves:	steady
d) Sureness:	present
e) Gun sureness:	present
f) Instinctive behavior, self-confidence and ability to cope with stress:	pronounced-does release

IV. Assessment while standing and while in motion:

a) Secondary Sex Characteristics:	pronounced
b) Constitution:	moderately robust
c) Expression:	lively
d) Structural Characteristics:	substantial,markedly long
e) Bones:	moderately strong
f) Musculature:	adequately developed
g) Firmness of front ligaments while standing:	good
h) Firmness of rear ligaments while standing:	good
i) Back:	adequately firm
j) Tightness of elbows:	good
k) Firmness of pasterns:	adequate
l) Front view:	straight
m) Croup:	normal position,somewhat short
n) Firmness of hocks:	good
o) Gait:	front/rear correct straight gait
p) Front reach:	good
q) Rear drive:	effective
r) Nails:	dark
s) Feet:	front-rear round/tight
t) Head:	strong
u) Eye color:	dark
v) Upper jaw:	well developed
w) Lower jaw:	powerful
x) Dentition:	healthy,strong,normal spacing,scissors bite
y) Dentition faults:
